

PSED

Story time with your favourite toys.

Pick a favourite story, or even make up your own story. Gather your cuddlies and superheroes round you and read/tell them a story.

Parents: Encourage them to tell or read a story, in their own words. Remind them to think about how a story starts and ends. Enjoy listening to their imaginations.

Art/DT

Can you make a tower to hold an egg?

How high, wide, inventive will it be?

Parents: There are suggestions on Pinterest. The egg can be plastic, real, chocolate or anything Easter related. Encourage them to think about how they are going to build it. What do they need to make it stand, will the egg roll off? Let them have a go and of course you can help if they need it too.

Topic Activities

Date: 30.03.20

Focus: Easter

P.E

How many bunny hops can you do in 1 minute?

Remember to warm up with a few stretches first and make sure you have a safe area to be a bunny.

Parents: You can help by checking they can bunny hop, timing them and supporting them to count.

Science

Float or sink. We loved our first experiment in Foundation. Can you try it at home? Have a look for 5 items you can use (ask permission😊)

First- Predict what you think will happen - sink X or float ✓ How are you going to record this? We used a chart in school. Can you make one in your book? Then carry out the experiment and see if you were right.

Parents: You can do this as small or large as you prefer! Listen to how they decide whether it will sink or float and ask questions to get them to think a little more about their reasoning.

Geography/History

Our House. Draw a picture of your house and the people who are living in it.

Can you remember your door number? Put this on the picture. You can also add which street you live in, your town and how many Easter eggs will you need in your home this year😊

Parents: See if they can remember what door number and street they live in before they start the activity.
