Dear Year 2,

I am writing to seek help to ensure that the children in Key Stage 1 drink plenty of water every day. The thought of this not happening is causing me great distress and apprehension.

Firstly, I find the behaviour and attitudes of some of the children deeply devastating. Did you know all living things must have water to survive? It is essential for life. You have a duty to drink at least 6-8 glasses of water a day. How do you sleep at night knowing this?

In addition, the fact is that the brain is the control centre for the body and is made of 80% water. Without regular trips to your water bottles, your friends will most certainly fail. Do you want your friends to be unsuccessful in class?

Surely, you agree that we need to act now! I trust that you and your classmates will be quick in acting to ensure the children of Key Stage 1 drink sufficient amounts of water a day.

Yours sincerely

Hayley Brown from Year 3
