

Leather drawstring purse pattern

To use this pattern:

- 1) Cut out the pattern below, and carefully draw around it on your cardboard.
- 2) Then, keeping the paper pattern on top, punch holes where the dots are marked – the holes will go through the cardboard too, in the right place!
- 3) Draw around the cardboard template onto your leather, marking all of the dots through the holes punched in your template.

- 4) You will need to draw and cut out two of the shapes to make your drawstring purse!
- 5) Punch holes through your leather shapes as marked by the dots – it is very important that the holes match up on both pieces of leather as these are used to thread up your drawstring purse.

When threading up your purse, follow the diagram (right). Starting from the middle hole (marked with an arrow on the pattern above).
